

## FEATURES

Easy-to-use  
cloud-based user  
interface

Compatible  
with full Blancco  
Data Erasure  
Management suite

Assimilation with  
asset lifecycle  
management

Digitally signed,  
tamper-proof  
reporting

## Cloud-Based Point of Control for Data Erasure Verification and Report Collecting

Blancco Cloud provides cloud-based data erasure management access to internal users, administrators and support staff. The solution requires no additional internal infrastructure or resources for deployment and is easily accessible via a secure portal. View all data erasure licenses, create and modify administrative users, monitor erasure activities and collect extensive tamper-proof, auditable reports.

## BENEFITS

### Safely Monitor Data Erasure Activities and Report Precisely on Results

Perform due diligence on necessary data erasure requirements and report on best practices to increase stakeholder buy in. Verify proof of compliance among national and international regulatory agencies, including ISO 27001 and ISO 27040 with a tamper-proof audit trail.

### Strengthen Internal Processes and Increase Asset Value

Eliminate the need for additional internal IT resources and infrastructure, while increasing the asset value and reducing asset management costs. Strengthen data erasure knowledge and awareness to prove the value of asset management for stakeholder buy in.

### Integrated into Blancco Data Erasure Management

The console is compatible with all products in the Blancco Data Erasure Management suite and provides the opportunity to easily upgrade existing products.

# TECHNICAL SPECIFICATIONS

## CENTRALIZED PROCESS MANAGEMENT:

Complete cloud-hosted service for operating and managing the data erasure process

Online access to a central database with minimum effort in report distribution

Full compatibility with all Blancco erasure software

Over 250 hardware details available

## REPORTING:

Comprehensive data reports can be browsed, imported, exported, deleted or modified by different users depending on their rights

Accurate and detailed reports can be exported in CSV and XML format

Automatic, secure and safe reporting via network (HTTPS)

## AUDITING:

Compliant (legal) erasure evidence

Comprehensive asset and chain of custody tracking

Full transparency of the erasure process

## USER MANAGEMENT:

Easy user management and distribution of user rights globally

Various user levels such as Partner (Reseller), Enterprise, Group and User

Administrator distribution of data erasure software and operator rights using Blancco's premium level technology

## LANGUAGE SUPPORT:

English, Japanese, French, German, Russian, Portuguese, Spanish
