

Mobile Device Recovery

We use our mobile devices for all our important data.

From our daily schedule and personal photos, to contacts and business applications. Kroll Ontrack understands mobile recovery needs to be quick and thorough.

Mobile Device Statistics

- Mobile device recoveries increased **161 percent** from 2011 to 2012.
- **31 percent** of cases were electronics-related physical damage.
- **23 percent** were the result of water or moisture damage.

Our Capabilities

Apple	iOS	Damaged by fire, flood or other disaster
Samsung	Android	Physical trauma
HTC	Windows	Electronic failure
LG		Firmware corruption
Microsoft		Unfinished update
Motorola		Data corruption
Google		Recovery Mode
Huawei		Updated OS and customer lost files
Kyocera		Device won't power on
		Operating system won't start
		Lost photos, contacts, etc. in recent upgrade

Data Recovery Tips

Stop

If you suspect that the device or storage media has failed:

- Turn off the device immediately,
- Do not reboot, shake, disassemble or attempt to clean/dry the damaged media,
- Where possible, remove battery and immediately disconnect from any charging source.

Do Not DIY

You should not attempt to perform recovery of the damaged media or you might experience:

- Unrecoverable data,
- Invalidated warranty.

Consult

Contact Kroll Ontrack for a free consultation by calling

800.872.2599.

They will discuss:

- Tips to prevent further data loss,
- The best option for your data recovery needs.

Important

- Ensure the media is protected and stored tightly in an anti-static bag with bubble wrap and foam protectors,
- Place small items such as flash media cards, USB drives and phones in an envelope before wrapping and placing in the box,
- Any necessary passcodes required to access the device should be provided by the user,
- Devices may be damaged upon reassembly or while attempting to recover your data,
- Options for repairing your device may not recover your data.
- Full suite of products and services (from remote, in-lab and on-site services to DIY software) to manage all our customers' general data management needs.
