

Blancco File Eraser – Secure File Eraser on Active Machines

Blancco File Eraser ensures full compliance and enhanced security by automating data erasure routines that selectively erase data on active PCs, laptops and servers.

Blancco File Eraser allows your organization to easily manage and automate data erasure routines - allowing users to reduce errors while enhancing security.

Key Benefits

Securely Erase Data in Live Environments

Automated, targeted erasure and shredding prevents the leakage of sensitive data. Use internal and external policy-based scheduling by implementing rules and automatic routines to securely erase files and folders. Live environment erasure avoids the need for system downtime during erasure.

Safely Monitor and Report on all Erasure Activity

Validate compliance among national and international regulatory bodies, including PCI DSS and HIPAA and utilize advanced reporting features to ensure a tamper-proof audit trail.

Refine Internal Processes and Improve Transparency

- Save time and resources with easy installation onto existing systems with remote installation and deployment.
- Take advantage of task automation capabilities, which allow automated erasure and increase productivity.
- Help strengthen knowledge and awareness of internal policies and processes across the business with scheduling and integrated erasure routines.

Why Blancco

As the de facto standard in data erasure, Blancco provides thousands of organizations with an absolute line of defense against costly security breaches, as well as verification of regulatory compliance through a 100% tamper-proof audit trail.

Our data erasure solutions have been tested, certified, approved and recommended by 18 governing bodies around the world.

No other security firm can boast this level of compliance with the most rigorous requirements set by government agencies, legal authorities and independent testing laboratories.

Technical Specifications

Erasure

- Erase a variety of files from programs like Microsoft Excel, Word and PowerPoint
- Overwrite selected files (including previous versions stored by Windows), free disk space, temporary files and the recycle bin
- Instantly erase files via drag-and-drop from the desktop to Blancco File Eraser
- Erase files and folders on the local computer
- Remotely execute secure erasure of files and folders on servers and in storage areas across the network
- Certified for use with Windows 10, 8, 7, Vista and XP
- Supports all global data erasure standards

Installation & User Management

- Easy installation on PCs and servers (both physical and virtual machines)
- Remote installation and deployment available through MSI package
- Central configuration of clients and multiple installations through group policy files
- Easy-to-use Windows GUI and advanced command line interface supporting multiple parameters for full flexibility of integration
- Can be run from a standalone USB stick when plugged into a computer or server for easy mobility and on demand operations*

*This requires a different version of Blancco File. Please contact your representative for more details.

Automation & Scheduling

- Schedule erasure of selected files on local or remote servers and workstations
- Implement rules and automatic routines to erase files and folders
- Enable policy-based scheduling and integration through Windows standard components
- Improve user interaction with multiple configuration alternatives available

Reporting

- Reports ensure compliance with standards and legislation like PCI DSS, requiring deletion of file-level data
- Centralized, digitally signed and tamper-proof report options
- Detailed PDF or CSV reports for easy viewing and XML files for centralized reporting
- Full support for the Windows event log
- Add custom fields in reports according to process requirements
- Detailed reporting includes everything needed for compliance such as security information, user data, file names and exact times
- Reports sent automatically to Blancco Management Console as soon as computer is online in the network

Supported Platforms

- Windows 10, 8.1, 8, 7, Vista, XP
- HP-UX 11.11 and HP-UX 11.31 with VXFS
- AIX 5.1 or later with JFS or JFS2.
- Solaris 10, 11

Auditing

- Full integration with Blancco Management Console for detailed auditing and control to ensure full compliance

Language Support

- English, French, Spanish, German and Japanese
