

Erasure Processes Made Easy

Just register and get started. Deletion, management, and verification of any number of erasure processes are a breeze with hosted erase.

Hosted Erase: Simple and well documented deletion

- Centralized web management of all your deletion processes
- Completed erasures of the connected computers and handheld devices are transmitted and recorded
- No need for separate installation or operation of web servers or SQL databases
- Simple online management of expired licenses without installation of HASP key or license manager
- Simple installation of Blancco erase software on the user machines to securely delete data from computers and mobile devices
- Erase client supports Blancco 5 and Blancco Mobile, the leading solutions for secure deletion
- Simply select available erasure options through the erase client

Hosted Erase enables the simple execution and centralized management of all your erasure processes, including detailed reports under a common web interface.

Centrally manage user rights and licenses

- Centralized administration, control, and allocation of user rights
- Administration and control of all used and available licenses
- Purchased licenses are available for immediate use

Comprehensive reporting of erasure processes

- Management of all the reports for your completed erasures and their processes
- Complete verification of proper erasure of all data in accordance with internal and external policies, laws, and regulations
- Reports can be saved as in CSV, PDF, and XML format for further processing
