# Deleting data within live environments.

BLANCCO LIVE ENVIRONMENT ERASURE SOLUTIONS ARE NOT ONLY FOR END-OF-LIFE ASSETS. Our deletion portfolio allow enterprise organisations to erase sensitive data from both PCs and servers whenever they need it. Running on existing operating systems, these solutions enable data erasure and prevent data leaks during the lifecycle of assets. In addition, automatic routines can be setup to ensure security regulations are strictly adhered to.

IMPLEMENT TARGETED, AUTOMATED DATA DELETION WITH THE BLANCCO LIVE ENVIRONMENT ERASURE PORTFOLIO:

- BLANCCO FILE
- BLANCCO LUN
- BLANCCO VIRTUAL
- BLANCCO FLASH

What does the Blancco Live Environment Erasure software portfolio offer?

These deletion software solutions offer improved efficiency for high volume processors. They support all Operating Systems and can be used to delete data from logical storage space within a live storage environment, even allowing for the recycling of high-end drives like FusionIO.

In addition, they are suitable for high volume requirements and can even be used remotely. They are fully compatible with the Blancco Management Console and can also be integrated into the Windows events log.

With our Live Environment Erasure solutions you can ensure sensitive business data has an additional layer of data protection and security to prevent breaches and other security threats.

BLANCCO FILE

Enable secure, selective data erasure on active PCs. This software is designed to offer users the ability to easily manage and automate data erasure routines to ensure full compliance and enhanced security.

Benefits

- Targeted, automated data erasure
- Easy to install and user-friendly
- Advanced reporting options
- Fully compliant with data protection regulations

BLANCCO LUN

Consolidate large quantities of data from hundreds – even thousands – of hard drives onto logical drives (LUNs) in order to erase data with greater ease and control. Simultaneously erase and shred multiple units in both physical and virtual environments. Don't sacrifice productivity, operational efficiency and metadata.

Benefits

- Targeted, automated data wiping
- Simultaneous erasure of multiple drives
- Compatible with Windows, Linux and UNIX environments

BLANCCO VIRTUAL

Automatically destroy all data when virtual servers are deleted. Without this solution, highly sensitive and confidential data can still re-emerge, causing irreparable damage to your corporate reputation, operations and revenue.

Benefits

- Targeted, automated data deletion
- Detailed, tamper-proof reporting

BLANCCO FLASH

Permanently erase flash memory from USB drives, SD cards, micro drives, CompactFlash cards and other flash memory storage devices. Reduce risk of data loss and fraud, perform due diligence into security best practices and prove 100% compliance with regulatory standards.

Benefits

- 100% permanent secure data erasure
- Easy to install and user-friendly
- Simultaneous erasure of multiple drives
- Supports all types of flash media, including USB drives, SD cards, Micro drives, MP3 players, network routers, cameras, and many more
