Enterprise edition provides user with VMware support for recovery and permanent deletions of data. Equipped with hardware and software RAID recovery support and an enhanced set of recovery tools: email recovery, hex viewer, S.M.A.R.T., bad block/block usage diagnostics, imaging tools, copy disk and refresh disk.

#### Ontrack® EasyRecovery™ Professional

A must have for small businesses that value their data, now with data erase and data protection features. Equipped with an enhanced set of recovery tools: email recovery, hex viewer, S.M.A.R.T., bad block/block usage diagnostics, imaging tools, copy disk and refresh disk.

#### Ontrack® EasyRecovery™ Home

The most comprehensive tool for home users, who need a quick and easy-to-use tool to recover, protect and erase digital photos, movies, music and important documents.

## Ontrack EasyRecovery capabilities

Recover emails, documents, databases, photos, multimedia files and other important data from local/external hard drives (HDD/SSD), optical and digital media, iPods, tablet devices and mobile phones that work as removable storage and disk image files.

Ontrack EasyRecovery has the ability to scan all volumes in a local machine and build a directory tree of lost and deleted files. Users can search lost and deleted files matching file name criteria, and the fast scanning engine allows the file list to be built quickly with an intuitive file manager and typical 'save file' dialogue.

The majority of recovered files have the ability to be previewed, and all recovery operations are secure as Ontrack EasyRecovery does not write recovered data onto the drive it is scanning. As a target for the recovered data, users can select any drive, including network drives and removable media. The standard write system API minimises the chance of disk corruption, and there is no limitation to file and drive size.

## Ontrack EasyRecovery advantages

Supports Microsoft® Windows 95, Microsoft Windows 98, Microsoft Windows NT, Microsoft Windows ME, Microsoft Windows 2000, Microsoft Windows XP, Microsoft Windows Vista, Microsoft Windows 2003, Microsoft Windows 7, Windows 10, all versions of Microsoft Windows Servers (Windows® version)
