

Data erasure software solutions

Data erasure will be even more important with the approval of the Global Data Protection Regulation (GDPR) by the European Parliament. All member states have to revise their existing data protection laws as it is now a binding law. National supervising authorities are entitled to give companies penalties of up to 4% of their worldwide turnover if they are caught in a data breach.

Hosted Erase

Hosted Erase is a web based data erasure solution that enables the simple execution and management of all your data sanitisation processes.

Benefits

- Centralised erasure management
- 100% data sanitisation
- Hosting of deletion records for at least 2 years
- No need for separate installation or operation of SQL databases
- Easy to use interface with customisable erasure options
- Simple online licence manager
- Comprehensive reporting features

Why choose erasure software?

Blancco software permanently removes data from IT assets such as PCs, servers, data center equipment and smartphones. By providing you with a documented erasure procedure, your devices are then able to be securely reused, resold or recycled.

HDD, SSD or servers

Blancco Drive Eraser ensures complete data sanitisation from HDDs, SSDs, servers, data center equipment and other large storage units.

Benefits

- Erase multiple hard drives simultaneously
- Time and cost effective process - the fastest in the industry
- Utilises the full write speed of your hardware
- Wipe up to hundreds of drives at a time
- Hardware support includes pass-through and dismantling for RAID arrays and SSDs
- Customised, tamper proof reports to comply with legal auditing requirements
- Fully compatible with Blancco Management Console

Mobile devices

Blancco Mobile Device Eraser software goes beyond simply restoring a device to factory settings; it ensures all data is securely wiped and can never be recovered.

Benefits

- Operating system independent
- Flexible and simple user interface
- Automatic and comprehensive erasure process allows a single operator to wipe hundreds of mobile devices per day
- Supports iOS, Android, BlackBerry, Symbian and Windows Mobile

Flash devices

Blancco Removable Media Eraser software permanently removes all data from storage media such as USB thumb drives and SD cards.

Benefits

- 100% permanent secure data erasure
- Easy to install and user friendly
- Simultaneous erasure of multiple drives
- Supports all types of flash media, including USB drives, SD cards, micro drives, MP3 players, network routers, cameras, and many more

Files and folders

Blancco File Eraser software permanently erases targeted data on active PCs, servers and virtual machines to prevent data breaches.

Benefits

- Targeted, automated data erasure
- Easy to install and user friendly
- Advanced reporting options
- Fully compliant with data protection regulations

LUN

Blancco LUN Eraser software helps to manage data security across active storage environments, providing 100% data sanitisation and peace of mind that all information has been permanently wiped.

Benefits

- Targeted, automated data wiping
- Simultaneous erasure of multiple drives
- Compatible with Windows, Linux and UNIX environments

Erase Management Console

The Blancco Management Console is a complete sanitisation platform that helps to centralise your disposal procedures.

Compatible with the entire Blancco software suite, this solution minimises user interaction by automating the erasure and reporting process.

Benefits

- Easy-to-use cloud based user interface
- Compatible with all Blancco data erasure software
- Digitally signed erasure reports
- User friendly interface
- Streamlines your erasure processes
- Save time and money through automation and scheduling
- Centralised distribution of software and collection of reports
