

Ensure Quick Access to Archive Data

Quick, cost-effective and risk-free access to your archive data with Ontrack. Confidently decide what data you need to retrieve and migrate.

Our customised projects provide you with a vantage point to make informed decisions that can help your business save time and money.

- Manage and easily access your archive tape libraries with our online tape catalogue service
- Restore and migrate specific items granularly
- Quickly recover and produce information on tapes to respond to time critical requests
- Streamline your data storage and save costs on archiving and backup technology
- Secure support for the management of your information risk at a company level
- Recover data from damaged or corrupted tapes
- Securely delete data with a certificate of erasure confirming the validity of the process

Reduce the cost, time and risk of managing archive data. *Whatever your tape requirement, Ontrack can help.*

Are These Scenarios Familiar?

- Need to quickly extract specific messages, mailboxes or entire EDB files from your archived tapes?
- Plan to replace or upgrade your backup infrastructure but still need to access archived data for compliance or regulatory reasons?
- Have multiple backup infrastructures and tapes following a merger or acquisition?
- Need to access old tapes but don't want to incur the cost of retaining various backup environments?
- Can't determine what data resides on which tapes?
- Unable to read backup tapes because they've been physically damaged or the data is corrupt?
- No longer have the hardware to read your legacy tapes?

We can take the stress out of your hands and ensure the transition of archived data is smooth and painless for you and your team.

We support all backup software and tape formats so you can be certain that we can help with your specific situation. Our tape services consist of four straightforward steps that make managing your archived tape an easy job.

We know managing archived data is not the most exciting of tasks, but by working with us, you'll have peace of mind that you can access what you want, when you want it while keeping your archive costs as low as possible.

By trusting Ontrack to help manage your legacy data, you will not only be able to quickly react to requests, better manage what data you keep and where you store it, but also reduce storage and maintenance costs.

Why work with Ontrack?

- World-leading data management services and software since 1985
- International coverage with 33 office locations for multi-site / jurisdiction cases
- 24/7/365 availability
- Over 30 years of technical experience and R&D capability to solve even the most challenging tape situations
- Proprietary software tools that work independently of backup infrastructure / software
- Strict security policies with chain of custody if required
- Security compliant - twice awarded by the US Department of Defence for outstanding security participation
