

Nebula Private Cloud

One small box with all the eDiscovery technology you need.

KLDiscovery's on-site eDiscovery solution, Nebula Private Cloud (NPC), is fast, powerful, and ready to deploy anywhere in the world. NPC provides our clients with an elegant solution to the many data privacy and logistical complexities associated with internal investigations, white-collar crimes, global fraud investigations, and cross-border litigations.

Your rapid response tool.

Nebula Private Cloud can be used in a wide variety of legal scenarios, including antitrust and anti-corruption investigations, and for litigation and arbitration cases. Our cutting-edge mobile technology will enable you to:

- Take advantage of Nebula™, KLDiscovery's revolutionary platform, with zero up-front investment and minimal long-term commitment.
- Conduct full-scale investigative and legal work without removing data from an organization or country.
- Manage internal data to ensure compliance and legal hold requirements are met.
- Stay secure – no connection outside company firewall required.
- Identify potential wrongdoing and people of interest.
- Respond rapidly to requests for information.
- Support multiple concurrent reviews and high-volume processing requirements.
- Comply with the GDPR, EU-U.S. Privacy Shield and other data protection regulations.

Our experts bring the data center to your office, allowing powerful processing, filtering and analysis without the need to transfer data outside the company or across borders.

Nebula Private Cloud can be deployed anywhere in the world, including your office.

More than just a response to litigations or investigations.

Nebula Private Cloud is a versatile tool that offers more control over eDiscovery and gives you the ability to streamline proactive compliance reviews and internal investigations. Custom built, NPC enables companies to use our world-class Nebula software on-site giving you total case management at your fingertips.

- Designed to be a self-sufficient, full featured processing engine, through review and productions
- Supports multiple concurrent reviews as well as high-volume processing requirements
- Nebula user interface is clean and simple to use for reviewers and administrators
- Ease of use with robust capabilities:
 - Drag and drop processing
 - Repository and a matter specific review platform — data can go to the repository for preservation/searching/ECA and also directly to a designated review database
 - A/V Suite
 - AutoRedaction
 - KLD Analytics which includes Near-duplicates and Email threading
 - Highly customizable while maintaining ease of use
 - Reporting and status cards make it fast and easy to find important information

Improving information governance.

Nebula Private Cloud can also be deployed to help you improve information governance. We can assist with:

Data Preservation

- Identifying data according to legal hold or business-use relevance
- Indexing and analyzing data that needs to be legally retained in large preservation repositories

Data Remediation and Disposal

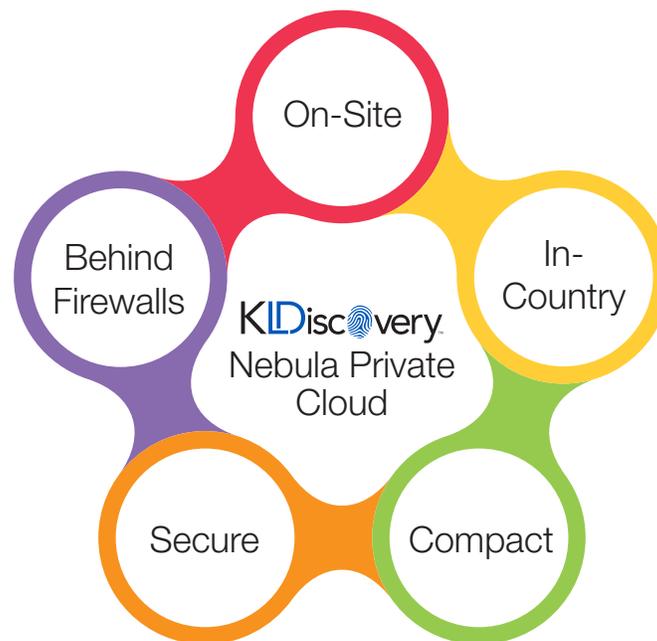

- Building and implementing a framework to isolate or categorize data for deletion, redaction or amendment in a repository to comply with legal obligations
- Disposing of flagged data defensibly

Records Management

- Testing the effectiveness of your records retention practices using data analysis, random sampling and dynamic reporting

Local knowledge, global reach.

By choosing to use the Nebula Private Cloud, you also gain the expertise of KLDDiscovery's forensic investigators, eDiscovery consultants and case managers who are familiar with local laws, languages and cultural considerations. Our global network allows us to deliver international solutions without compromising on local knowledge.
