

## Simplicity redefined.

## Nebula™

The most complete eDiscovery solution available today, offering end-to-end control in a single tool. Nebula provides an intuitive yet powerful platform that distinguishes itself in both functionality and user experience, providing smarter ways to analyze, process, review, and manage large data sets. Backed by KLDisc Discovery's industry-leading 24/7/365 support, our experienced project managers and data analysts are available to assist at any point along the way.

### Built with User Experience in Mind

Nebula brings a modern approach to case management that surpasses the older generation of tools in both feature set and usability. Nebula simplifies eDiscovery by minimizing the learning curve and ensuring that critical information is easily accessible and readily available. This results in clients that are inherently proficient, which translates into time and cost savings across the board.

### Robust Capabilities

Comprehensive functionality and advanced technology combine all the features and tools you need within one seamless interface, eliminating the need for third-party plugins or partially integrated applications. Nebula comes fully loaded with workflow accelerators and proprietary software only found at KLDisc Discovery.

### The Flexibility You Need

Nebula can now be hosted on-prem or within the Microsoft Azure cloud, offering scalability and rapid deployment to meet your unique needs. Clients can also utilize Nebula Private Cloud, allowing powerful processing, filtering and analysis without the need to transfer data outside the company or across borders.

KLDisc Discovery's Nebula is truly next gen eDiscovery software, providing reliability and ease-of-use with every step, all backed by our industry-leading 24/7/365 support team.

# Take Control of Your Review with Nebula's Workflow Accelerators and Artificial Intelligence

A New Standard in eDiscovery.

## Predictive Coding

Award-winning, patented technology that leverages human expertise to drive results. Predictive Coding learns from both user decisions and random sampling to immediately and continuously prioritize important documents for review. Quality Control and Sampling monitors the effectiveness of document categorizations to arrive at the necessary confidence levels to ensure defensibility.

## Native Spreadsheet Redaction

Allows reviewers to redact content from within Excel files without the need to convert to TIFF images. Options for redactions include removal of rows, columns, worksheets, formulas, cells and standard text redactions. Pristine copies of the original file are always maintained.

## AV Suite

Winner of the 2016 Relativity Innovation Award for Best Service Provider Solution and People's Choice, AV Suite simplifies the review of multimedia files. Visualize audio files and have total playback control. Easily redact and produce audio files – something no other review platform can provide.

## AutoRedaction

Protect sensitive information and streamline the redaction process with an automated approach. Greatly reduce the burden of redacting documents by automatically finding and redacting personally identifiable information, privileged content and other sensitive information.

## PrivLog Builder®

Utilize an integrated suite of tools with advanced functionality to effectively build privilege logs. Automated privilege log features and name standardization saves time and produces remarkable results.

## Workflow

Automate the routing and distribution of documents to streamline document review and maximize accuracy and defensibility.
